# FashionBOT: become fashionable
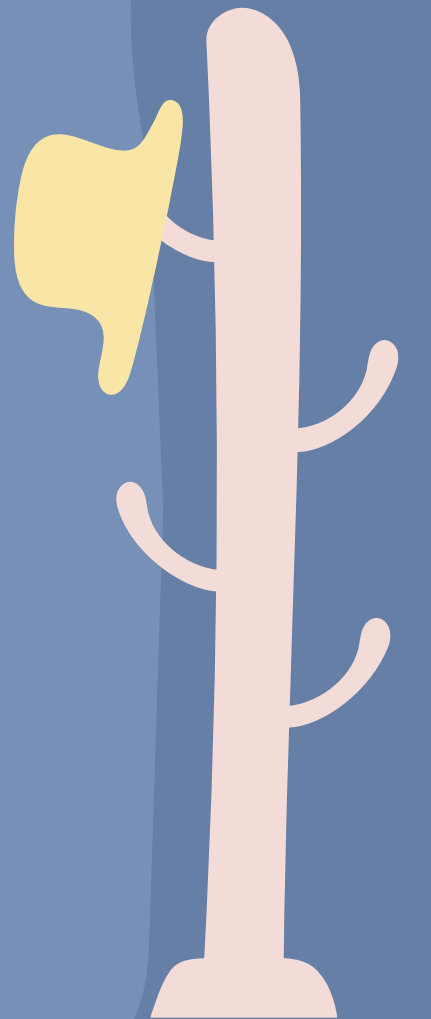

Presented by Erman & Julien

Introduction

Lacking the time or inspiration to create an outfit?

Not finding a solution, we created it ourselves: Fashion Bot.

Discuss, converse, and it suggests a style for you!

Targets

Engaging in fashion conversations

Generating fashion advice

Collecting user information

Displaying recommendations in images

# Structure of our algorithm

User information gathering → Fashion advice generation using LLM → Image Generation → Finish the session
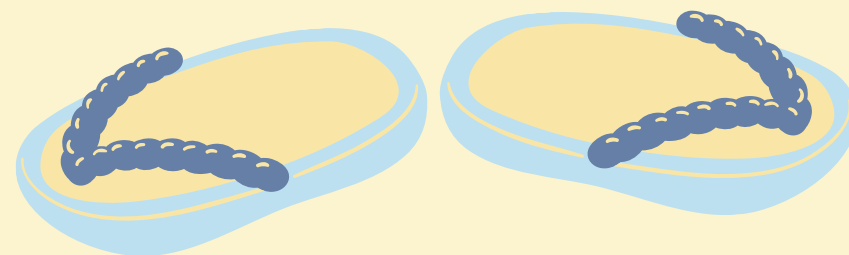

Conclusion

Very rewarding project for us. It touches on a subject we're passionate about, which is fashion.

We used what we've learnt but also things we've never done before, like prompt engineering.

Thank You

Let's try Fashion BOT
